PROPERTIES

- largely resistant to: oil, for details, see "Technical Information"
- the materials used during manufacturing are cadmium-free, contain no silicone and are free from substances harmful to the wetting properties of lacquers

TESTS

- flame-retardant acc. to DIN VDE 0482-332-1-2 / DIN EN 60332-1-2 / IEC 60332-1-2

APPLICATION

For flexible use with free movement without tensile stress or forced movements in dry, moist and wet rooms but not outside; to be used as control and connecting cable in control and regulation technology, in the tool and machine building industry, in computer systems, as well as a signal cable in the electronic industry. A stabilizing foil separator between wire bound and braid reduces the outer diameter essentially and allows for smaller bending radius as well as lower weights. The disturbance free transmission of signals and impulses is ensured due to the high degree of screening. EMC = Electromagnetic Compatibility; in order to optimise EMC properties, we recommend a double-sided and all-round large contact area of the copper braiding.

NOTES

- the conductor is metrically (mm²) constructed, AWG numbers are approximated, and are for reference only
- please note "cleanroom qualification" in your order
- 2 - 100 core(s): VDE-Reg.-No. 7034
